

L'ÉLÉPHANT VERT

**“C’EST DU PROPRE !”**  
**A two-acts tragi-comedy theatre**  
**and sound for public spaces**

**Technical conditions**

- A “reperage”, or check-up tour is desirable in order to determinate the playing places  
(acoustic quality of the place, reverberation of the floor, ...)

It can be done with photos and plans (maps, layouts, schemes...)

The sound scattering’s device use the ground’s reflection.

This is why the ground should not be absorbent (no grass, sand, carpet...)

- Two empty and flat play-grounds, opening 13m x deep 9m + public space.

It must be either 1 or 2 important areas (if 2 :30 to 50 m away from one to the other).

It preferably should have a background (façade , ..., or natural background : hedge, ...)

Those two play-grounds should be available at least 4 hours before to show, for the rehearsal.

It is important not to have too much noise pollution during the performance  
(other music shows or sound performances, funfairs, noisy traffic jam...).

A secure car-park should be at our disposal for the whole time of our stay

(It should be at the charge of the organiser if the park is necessary)

The performance should happen during day-time. If it’s at night,

a light technical list has to be made according to the existing lighting on the play-ground.

In summer, the performance won’t be possible at the really hot hours (more or less from 11am to 4pm)  
due to the summer heat (places and hours should be choosen in consequences)

- A dressing room, of 50 m2 minimum, has to be at street level (if not, a lift is extremely important)

It has to be available 24h/24, for 8 people and close to the performance playing spaces.

- Toilets and shower (especially in summer), standard main power supply (220 V) with an adapter.

- Tables (all together 10 m long), chairs (10), water and fruits.

- For our organisation (batteries loading, warming-up and dressing ), you should anticipate our arrival at the  
festival at least 6 hours before the performance (3 hours minimum afterwards).

However, beyond 300 km drive from our place, arrival must be anticipate the day before the performance.

- Performance duration : 50 mn

- Capacity : 400 to 600 people
